Summary

Business Systems Analyst, Full-Stack Developer, and Lecturer with over eight years of experience in requirements engineering, enterprise application development, business process improvement, digital transformation, and higher education. Skilled in translating business needs into scalable technology solutions through stakeholder engagement, process modeling, software development, and quality assurance. Experienced in Business Requirements Documents (BRDs), Software Requirements Specifications (SRSs), UML, BPMN, business process analysis, requirements traceability, User Acceptance Testing (UAT), Agile/Scrum, SDLC, database design, and AI/ML-based solutions. Proven ability to collaborate with business stakeholders, developers, QA engineers, and executive leadership to deliver high-quality information systems.

Education

Master of Science in Computer Networking (CGPA: 3.54/4.00) 2021

Jimma University

Thesis: Enhanced Speed Based Selective Emergency Message Forwarding Scheme for VANET.

Bachelor of Science in Information Systems (CGPA: 3.40/4.00) 2016

Haramaya University

Professional Experience

Lecturer & Researcher

Addis Ababa, Ethiopia

Ethiopian Public Service University

March 2026 – Present

- Led the development of the B.Sc. in Information Systems curriculum aligned with industry and academic standards.
- Designed competency-based curricula, assessments, and learning resources
- Conducted research in IS and Digital Transformation, producing scholarly publications.

- Supervised research, software development, and capstone projects.
- Contributed to institutional digital transformation and business process improvement initiatives.

Lecturer, Researcher & Software Developer

Tepi, Ethiopia

Mizan-Tepi University

November 2018 – January 2026

- Gathered and analyzed business requirements for university automation and digital transformation initiatives.
 - Prepared BRDs, SRSs, UML models, process workflows, and system specifications.
 - Facilitated requirement validation, system testing, deployment, and continuous system improvement.
 - Designed and implemented full-stack web applications using MERN technologies.
 - Delivered Information Systems and Software Engineering courses while supervising student projects.
 - Conducted AI, Machine Learning, and Knowledge-Based Systems research resulting in scholarly publications.
-

Projects

South West Ethiopia Supreme Court Management System

Personal Project

2024 – Present

Role: Quality Assurance & Full-Stack Developer Tech Stack: MERN, REST APIs

- Conducted Court system workflow analysis and stakeholder requirement elicitation.
 - Defined functional requirements, non-functional requirements, user stories, and business process models.
 - Designed the overall system architecture, database model, APIs, and application workflows.
 - Developed an intelligent immunization management platform supporting vaccination scheduling, reminders, reporting, and decision support.
 - Implemented secure authentication, role-based access control, and automated notification services.
-

Adventure Works Sales Report Power BI projects

Evangadi Tech

2025-present

Role: Power BI Developer

Tech Stack: P BI Desktop, BI Services, SQL

- Designed and developed a real-time ETL in Data Extraction and the Power BI platform.
 - Implemented Power Query Editor to transform the data
 - Integrated Power Apps with Power BI and optimized Power BI Reports for Mobile
 - Optimized application performance and database queries for improved scalability.
-

Evangadi Networks Forum

Evangadi Tech

2023-2024

Role: Full-Stack Developer

Tech Stack: React.js, Node.js, MySQL

- Designed and developed a real-time community discussion platform.
 - Implemented secure authentication, user management, question-and-answer features, and role-based authorization.
 - Developed RESTful APIs and integrated frontend and backend services.
 - Optimized application performance and database queries for improved scalability.
-

Netflix UI Replica

Personal Project

2023

Role: Front-End Developer

Tech Stack: React.js, YouTube API

- Developed a responsive Netflix-inspired user interface using React.js.
 - Integrated YouTube APIs to retrieve and display dynamic movie trailers.
 - Implemented reusable React components, responsive layouts, and state management.
 - Improved user experience through modern UI design principles and optimized performance.
-

Mentor Performance Evaluation System for ALX Staff

ALX Tech

2020-2022

Role: Back-End Developer

Tech Stack: React.js, Node.js, MySQL

- Designed and developed a real-time community discussion platform.
- Implemented secure authentication, user management, question-and-answer features, and role-based authorization.
- Developed RESTful APIs, Redux Connectors, and integrated frontend and backend services.

- Optimized application performance and database queries for improved scalability.

Core Competencies

Business Analysis	Requirements Engineering, Business Process Analysis, Business Process Modeling, BRD, SRS, UML, Use Case Modeling, Gap Analysis, Requirements Traceability Matrix (RTM), User Acceptance Testing (UAT), Stakeholder Management, Functional & Non-Functional Requirements
Software Development	Java, Python, JavaScript, React.js, Next.js, Node.js, Express.js, REST APIs, HTML5, CSS3, Tailwind CSS
Databases	PostgreSQL, MySQL, MongoDB, SQL, Database Design.
Artificial Intelligence	Machine Learning, TensorFlow, PyTorch, Scikit-learn, Knowledge-Based Systems, Data Analytics, Power BI
DevOps & Tools	Git, GitHub, Postman, Jira, VS Code, Linux
Methodologies	Agile, Scrum, Waterfall, SDLC, Object-Oriented Analysis and Design
Professional Skills	Leadership, Communication, Critical Thinking, Problem Solving, Analytical Thinking, Team Collaboration, Training, Technical Documentation, Presentation Skills
